

One integrated program across paid advertising, a custom website, technical SEO and generative-engine optimization, a content pipeline, and organic social. A single monthly retainer of **\$15,000**, plus a managed media budget, run by one team accountable end to end.

- Six-month term.** Paid media can move immediately, but the website rebuild, technical SEO and GEO, and the content library compound over months, not weeks. Six months gives the foundation time to be built and to start paying back, and lets the program be judged on a real trend rather than a single month.

A fully functional, integrated website is a key piece of a successful marketing ecosystem. We build the revamped website and improve SEO and GEO free of charge for the six-month term, because an optimized site lifts the performance of both the paid and the organic work.
